Introducing DynaMo

Another innovation by GSI...

Our state-of-the-art V-STARS 3D measurement systems are now powered by DynaMo, GSI's new series of high-speed, high-resolution cameras.

Features

- Ruggedized dual Ethernet cabling (for data and power)
- Notebook operation
- Fast, low-visibility flash system
- Wide field of view and large operating range
- Positive pressure "dust off " system
- High resolution, speed, accuracy
  - V-STARS/D2 – 2M pixel, up to 10Hz, 20um + 20um/M
  - V-STARS/D5 – 5M pixel, up to 10Hz, 16um + 16um/M
